Inspector Observations:

This is a secondary follow up investigation from a complaint received (CO0069161).

-Observed one live cockroach by the stainless steel panel behind the steam table. Cover and protect all food from potential contamination. Contact pest control services to continue to remediate the issue. Eliminate all cracks and crevices between the stainless-steel panels at the back wall of the cook line.

-Observed dead roaches on the shelf above the grill, on the floor below the steam table, on the floor at the drive through area, on the front shelving near boxes of utensils and on the shelving by the front register. Clean and sanitize all affected areas.

-Clean and sanitize all affected areas, cooking equipment (underneath the grills, the burners at the stove, the anseel system and hood, the interior and sides of the fryers) at the cook line, and the floors throughout the facility.

The facility is closed due to a continued cockroach infestation. Facility has had pest control services from Integrity on 5/28/2019 and CruzControl Termite on 5/31/2019. The facility will be reopened when no evidence of active infestation can be found, no evidence of dead vermin can be found and all of the cleaning is completed. Closure signs posted and A card removed.

Contact the Department of Environmental Health at 951-461-0284 to schedule a reinspection.
